

# LEVELING THE PLAYING FIELD – REDUCING DISPARITIES IN CANCER CARE

Joanne Schottinger MD Southern California Permanente Medical Group 11/14/17

## HOW DO INTEGRATED HEALTH CARE SYSTEMS ADDRESS RACIAL AND ETHNIC DISPARITIES IN COLON CANCER? JCO 3/10/15

Retrospective review of 30,00 CA Cancer Registry records (2001-2006)

Higher rates of evidence based care with adherence to NCCN guidelines was associated with LOWER 5 year mortality.

Screening, Performance of Surgery, Adequate lymph node evaluation, Delivery of chemotherapy

Racial/Ethnic disparities in survival were ABSENT in the integrated system, with no disparity for survival in any minority group as compared to white race. In all other systems, black race was associated with increased hazard of mortality.

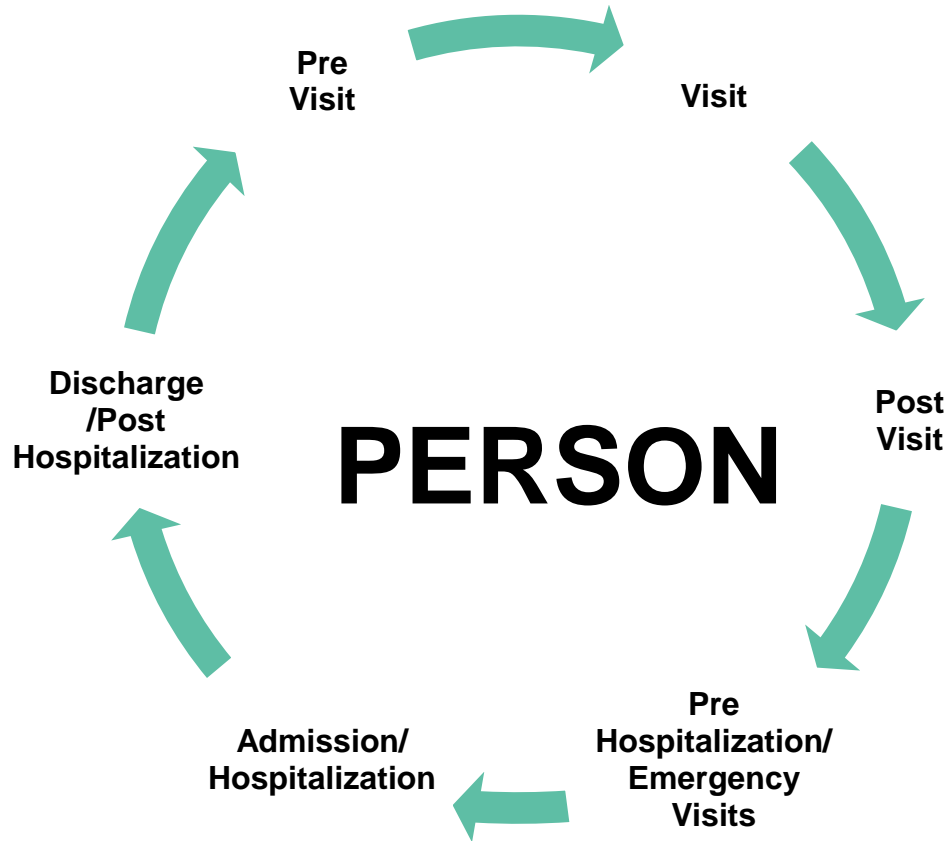

# Complete Care

Every patient. Every place.

Every visit. Every time.

Every one.
